

low-volume liquid handlers for genomics

 **ttp labtech**

low-volume liquid handling with mosquito[®]

accuracy and precision

with nanolitre to microlitre volumes using rapid true positive displacement pipetting technology

reduce sample and reagent consumption

achieve up to 50-fold reduction in reagents

handles liquids with high viscosity accurately

such as enzymes in glycerol or genomic DNA

no cross-contamination

no carryover with low-cost disposable pipettes

future-proof versatile open platform

miniaturise any assay with mosquito by easily creating new protocols

miniaturise any assay

TTP Labtech's mosquito saves cost and increases throughput for the following applications:

NGS

library prep

including quantification,
normalisation and magnetic
bead-based cleanup

single cell genomics

microbial genomics

or any other assay!

validated protocols include:

- ✓ **Nextera XT library prep** [1,2]
- ✓ **CEL-seq cDNA synthesis** [3]
- ✓ **DNA quantification by qPCR** [4]
- ✓ **SMART-seq** [5]
- ✓ **NGS library normalisation** [1]
